

# 2012 WPCAC ANNUAL MEETING AND SYMPONYIUM

Saturday, February 11, 2012

10:00 a.m. WPCAC Annual General Meeting

11:30 a.m. - 12:30 p.m. Lunch/Networking

1:00 p.m. **Bitting for a Calm and Relaxed Mind**  
Dale Myler, Myler Bits USA

5:30 p.m. Dinner and WPCAC Awards presentation

Dale Myler and his brothers are third generation horsemen, and are three of the world's leading bit designers. Because of Dale's extensive research into equine dentistry and equine physiology, the Myler's have been able to bring an added understanding of the connection between biting and the equine mouth to their designs.

This presentation, open to ALL who are interested in our equine friends, is an educational program involving the similarities between the human being and the horses we work. There are a lot of horses in the presentation, but it is not a commercial about Myler bits. This is about the anatomy and physiology of the mouth as it relates to bits. One needs to understand the anatomy of the horse's tongue, head & neck and how the front part of the animal's body relates to the movement of the whole body. .

Please come and join us to learn how this anatomy and physiology translates into a horse that is able to move freely and with more coordination when his tongue is free and soft, thus "*Bitting for a Calm & Relaxed Mind*".

This event will take place at the **Stockton Hilton, 2323 Grand Canal Blvd., Stockton, CA.** Please register by February 4, 2012, by completing the Registration Form below and sending it to WPCAC, c/o 13388 Renke Road, Galt, CA 95632-8320. Checks should be made payable to WPCAC.
